

5G INTERNSHIPS

The International Center for Leading Studies, true to its mission, tries to stay ahead in today's world through innovation in all sectors. We are proud to launch our new innovative 5G Internship* program designed to offer students a means of reducing their tuition, through scholarships on upcoming T.I.C.L.S. programs.

Interested Students are invited to apply for an internship position to earn tuition-reducing scholarships and obtain work experience, further improving their CV.

Internships are available during the semesters before the program, and can be completed at the student's home / campus, without geographic restrictions. Alternatively, there is also an opportunity to do it during our upcoming programs on site.

Why do your internship with T.I.C.L.S.?

- **Valuable experience:** T.I.C.L.S. is looking for motivated forward-thinking students who want to join our team and help us promote the vision of interdisciplinary broader contemporary knowledge and wisdom worldwide. Working with our staff and professors in an exciting international setting, on innovative programs, present a learning-based opportunity one of the qualities that make the T.I.C.L.S. experience remembered for a lifetime.
- **Resume (CV) builder:** Internships act as a bridge between college and a career. Joining T.I.C.L.S. in a professional setting is an experience that can be illustrated on a student's résumé. Working with an education N.G.O., on international projects with a global team, offers an experience that can enhance career prospects and build an international network, an important asset in today's intertwined economies.
- **Academic credit (optional):** To determine the eligibility of earning credits for the internship, students should meet with their academic advisor or faculty department supervisor of their home university and obtain necessary approval. T.I.C.L.S. will conform to necessary paperwork.

Types of projects T.I.C.L.S. 5G interns might work on:

Working online from home / campus, students that join T.I.C.L.S. on an internship program may be involved on a variety of projects. Promoting the programs at your school and recruiting others to join our remarkable team will add to your personal self-esteem but also make available extra scholarship credit. Some options include:

1. **Social Media Marketing:** Before, during and after an upcoming program, interns help T.I.C.L.S. to create and share content on our various platforms: Facebook, Twitter, blog, Instagram, and more. Interns help by developing and implementing new and creative campaigns, share results of these activities with our team members and engage in continuous learning in a variety of subjects, such as writing and designing skills.

5G INTERNSHIPS

2. **Program Planning:** Interns help out on a variety of projects as we prepare for our upcoming programs, including content and recruitment material creation, assistance in developing membership recruitment material, meeting with other applicants or even business associates in their area, raising funds, and more.
3. **Program Operations:** During the program, students work on a variety of tasks, including logistics and entertainment. Students typically work 1-2 hours per day, although some days may be longer than others. There will be meetings with professors and staff, and the interns are expected to be proactive, engaging and friendly.
4. **Other projects:** Will vary depending on Intern's interests and abilities. Do you have a special project in mind? Perhaps you have specific skills such as graphic design, photography or video production? Or, perhaps administrative or organizational skills? Do you just like helping out?

Students who have two or more years left at their school are preferred but not required.

We hope to hear from you soon!

Explanatory Note * 5G (fifth-generation) communications networks enable interaction between users of various types of equipment, either mobile or fixed; they are the foundation of the Internet. The 5G internship experience is a win-win situation, on the modern version, opening new opportunities. Positive for the intern, who gains work experience in a profession of interest, networks with employees and managers who could later assist with career choices, and starts a decision-making process regarding possible lifelong career options. Positive for the company that has the added assistance of young persons and contributes to the education of students who will be better prepared due to experience gained.
